WELCOME TO OUR COMPANY

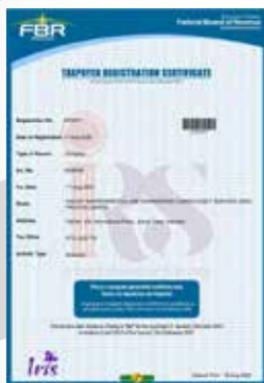

Galaxy Environmental (Pvt) Ltd. is an independent company registered with the Securities and Exchange Commission of Pakistan (SECP), Federal Board of Revenue (FBR), and Balochistan Revenue Authority (BRA) offering consultancy, Monitoring, and analysis in all aspects of Environmental pollution and waste management.

In the process of managing a wide range of Environmental problems we have developed expertise in the following areas:

- Commercial Areas
- Construction Sites
- Indoor Laboratories
- Roads and Highways
- Shipbreaking Yards
- Industrial Areas
- Housing projects
- Hospital Waste Management
- Cell phone towers

We work extensively with both private and public sectors and are accustomed to dealing with Environmental issues. Since we have no financial or other commitment to contractors, developers, manufacturers, or government authorities, we are particularly suited to providing independent, impartial advice based on an objective scientific assessment of a situation.

Each contract, large or small, is handled by a project manager who can call on a multidisciplinary team of specialists to conduct large-scale investigations when required.

MISSION

Our mission is to provide services of superior quality and value that best meet the needs and demands of our clients and conform to the Best Available Professional Practices (BAPP) and Environmental Management Plan (EMP) based on Initial Environmental Examination (IEE) and Environmental Impact Assessment (EIA).

We will achieve this mission through a focused organization with an auspicious working environment that attracts the finest people and develops and challenges individual professionals of different disciplines. Galaxy Environmental is an establishment with a record of performance and integrity.

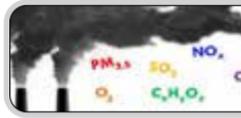

WHY CHOOSE US

Expert Team
Lorem ipsum dolor sit amet, consectetur a adipiscing elit, sed diam nonummy nibh euismod tincidunt ut

WE PROVIDE BEST SOLUTION

Lorem ipsum dolor sit amet, consectetur a adipiscing elit, sed

VISION

Galaxy Environmental (Pvt) Ltd. is a growing company that is dedicated to excellence in environmental management. We are committed to providing the best environment for our clients so that they can pursue their business goals unencumbered by environmental problems.

Galaxy Environmental (Pvt) Ltd. is poised to be one of the best environmental companies in the country, a Leader and pacesetter in the business. We will provide services and products that meet or exceed the needs and demands of our clients. We will relentlessly pursue continuous improvement and innovation in Environmental management and we do keep in touch with the latest advancement in the field to create significant competitive advantages compared to international standards.

ENVIRONMENTAL ASSESSMENTS

In Galaxy Environmental (Pvt) Ltd., Specialists have extensive experience in the assessment process. Consultants are qualified and experienced in dealing with: Environmental Impact Assessment (EIA), Environmental Audits (EIA), Environmental Evaluation Report (EER), and Post Environmental Assessment (PIA). Identification of the likely effects of new development to plan inquiries or in preparation for presenting new proposals to government bodies, planning departments, or industrial or neighbor communities.

WORKING PROCESS

ENVIRONMENTAL AUDITS

- Audits for Internal Elements Including Health And Safety Issues
- Audits for External Elements Including Impacts on Surrounding Air, Land and Water Resources
- Recommendations for Maximizing Short and Long-Term Financial Efficiency
- Performance Optimization
- Audits for ISO 14000 Standards

ENVIRONMENTAL MONITORING AND CONTROL

- Analysis of Chemical and Biochemical Contaminants
- Effluent Sampling and Analysis
- Emissions Measurements and Monitoring
- Dispersion Models and Forecasts
- Noise Measurement
- Traffic Noise Modelling

ENVIRONMENTAL ASSESSMENTS

AIR POLLUTION MODELING

Prediction of air pollution levels utilizing air modeling techniques for many points, lines, and area source emissions.

AIR QUALITY

Air quality and process stack emission analyses, with subsequent recommendations and supervision of control measures, ambient air quality monitoring, and roadside monitoring of vehicular pollutants.

WATER QUALITY

Water Quality and process effluent analysis and recommendations on water treatment regimes. This includes groundwater studies.

CONTAMINATED LAND

Identification and evaluation of the degree of pollution on site. This commences with the initial site appraisal, and analyses, through to subsequent proposals for remedial action and supervision of remedial site work.

HAZARDOUS WASTE

Hazardous Waste handling and disposal, (recommendations and supervision). This is a field where technology is developing along with the public perception of the need for effective waste management. Originally limited to crude landfill, methods have come to include controlled landfill, neutralization, and incineration.

The latest approach is to consider whole processes concentrating on waste minimization or "clean technology" and avoiding "end of pipe" solutions.

QUALITY ASSURANCE

Galaxy Environmental (Pvt) Ltd. is vigilant in maintaining high standards. Our Analysts participate in a vigorous internal Quality control scheme every 3 months. In addition, the company has technical working agreements with accredited consultants and laboratories.

STANDARD PROCEDURES

The in-house systems manual specifies that results and reports are submitted for review by another competent person to ensure consistency and accuracy.

CONSULTANCY SERVICES

Organizations wishing to gain any kind of Environmental Certification utilize our consultant's expertise and to this end, several other companies take part in our quality control schemes.

IMPACT ASSESSMENT

- Carrying out Initial Environmental Examination (IEE)
- Preparation of Environmental Impact Statement (EIS)
- Technical Assistance In Addressing Environmental Implications
- Technical Advice on Mitigation Measures
- Design & Execution of Impact Monitoring Systems

ENVIRONMENTAL TRAINING & EDUCATION

- Environmental Awareness
- Cleaner Production
- Environmental Management Systems and Eco-labeling
- Industrial Wastewater Management
- Environmental Assessment & Auditing
- Energy Efficiency & Conservation
- Occupational Health & Safety

ANALYSES AND INTERPRETATION

Samples are analyzed using standard methods, and the results are compared with relevant current standards. More detailed interpretation and advice on remedial measures can be provided in conjunction with Galaxy Environmental (Pvt) Ltd.'s specialist consultants.

METHOD DEVELOPMENT

Existing methods can be adapted to suit unusual sampling conditions and methods can be validated to ensure meaningful results. Where a suitable method does not exist, a sampling and analytical method can be developed.

SAMPLE ON SAMPLING AND ANALYSIS

Advice on sampling methods, sample preparation, and analyses can be provided by analytical chemists.

TRAINING

Out-of-station or in-house training can be organized.

PROVISION OF A CHEMIST ON SITE

For some projects e.g. field trials, a chemist can be provided to analyze samples in the client's lab using Galaxy Environmental (Pvt) Ltd. or the client's instruments.

NOISE AND VIBRATION

Environmental noise and vibration measurements and assessment of nuisance and disturbance. Prediction of noise and vibration impacts and design of remedial measures.

RADIOLOGICAL PROTECTION

Radiological protection from baseline monitoring of soil, water, crop, and foodstuffs. As much as anything, regular monitoring can give positive assurance where there is negligible effect, without these figures, the local concern could lead to unmanageable public pressures.

CORPORATE ENVIRONMENTAL AUDITS

- To identify all potentially dangerous emissions to the ENVIRONMENT (air, water, or solid waste) and comment on control strategies and compliance with current legislation.

- To evaluate the effectiveness of the company's environmental management.

LABORATORY ANALYSIS

We offer support to those carrying out monitoring and sampling exercises in occupational hygiene and environmental pollution. These services include:
